Vanessa Guzmán-Clark

Interim Chief Financial Officer
(Principal Financial and Accounting Officer)

Disclaimer

Safe Harbor

This presentation includes "forward-looking statements" within the meaning of that term in Section 27A of the Securities Act of 1933, as amended and Section 21E of the Securities Exchange Act of 1934, as amended, and are made in reliance upon such acts and the "safe harbor" provisions of the Private Securities Libigation Reform Act of 1955, DMS's actual results may differ from its expectations, estimates and projections and consequently, you should not rely on these forward-looking statements as predictions of future events. These forward statements are often identified by words such as "expect," "estimate," "pripedt,," "budget," "forecast," "radicipate," "intend," "plan," "may," "yail," "coud," "should," "believes," "predicts," "protetat," "tooritune," and similar expressions. These forward looking statements include, without limitation, DMS's expectations with respect to its and ClickDealer's future performance and its ability to implement its strategy and are based on the beliefs and expectations of our management team from the information available at the time such statements are made. These forward-looking statements involve significant in the state of the second of the

Non-GAAP Financial Measures

In addition to providing financial measurements based on accounting principles generally accepted in the United States of America ("GAAP"), this presentation includes additional financial measurements based on accounting principles generally accepted in the United States of America ("GAAP"), this presentation includes additional financial measurements based on accounting principles generally accepted in the United States of America ("GAAP"), this presentation includes additional financial measurements based on accounting principles generally accepted in the United States of America ("GAAP"), this presentation includes additional financial measurements based on accounting principles generally accepted in the United States of America ("GAAP"), this presentation includes additional financial measurements based on accounting principles generally accepted in the United States of America ("GAAP"), this presentation includes additional financial measurements based on accounting principles generally accepted in the United States of America ("GAAP"), this presentation includes additional financial measurements based on accounting principles generally accepted in the United States of America ("GAAP"), this presentation includes additional financial measurements based on accounting principles generally accepted in the United States of America ("GAAP"), this presentation includes additional financial measurements and the United States of America ("GAAP"), this presentation includes additional financial measurements and the United States of America ("GAAP"), this presentation includes additional financial measurements and the United States of America ("GAAP"), this presentation includes additional financial measurements and the United States of America ("GAAP"), this presentation includes additional financial measurements and the United States of America ("GAAP"), this presentation includes additional financial measurements and the United States of America ("GAAP"), this presentation includes additional financial measuremen

A reconciliation of non-GAAP financial measures to the most directly comparable GAAP financial measures can be found below. For guidance purposes, the company is not providing a quantitative reconciliation of adjusted EBITDA and Variable Marketing Margin in reliance on the "unreasonable efforts" exception for forward-looking non-GAAP measures set forth in SEC rules because certain financial information, the probable significance of which cannot be determined, is not available and cannot be reasonable effort measonable effort and expenses.

We use these financial measures internally to review the performance of our business units without regard to certain accounting treatments and non-recurring items. We believe that presentation of these non-GAAP financial measures provides useful information to investors regarding our results of operations. Because of these limitations, management relies primarily on its GAAP results and uses non-GAAP measures only as a supplement.

As digital marketing experts, we leverage our first-party data, proprietary technology, and expansive media reach to connect advertisers with customers.

Key DMS Long Term Growth Drivers

Auto Insurance Enterprise Carrier Recovery

 Stay aligned with our strategic advertising partners and work with them as they reposition and redeploy their marketing budgets as the P&C segment recovers from historically high loss ratios

Internal Organic Growth

- Invest in people, process and technology to identify new revenue opportunities and clients
- Invest into owned-andoperated marketplace solutions
- Invest in our data asset and Al, including data signal consumer enhancements for omnichannel activations
- Invest in key media resources and partnerships to drive LTV and ROI

Auto Insurance Agent Growth

 Agent-based expansion within auto insurance category with active enterprise insurance advertisers. Grow to 10,000 agents on the DMS platform

Health Insurance Growth

 Expand into rapid growth verticals including Health Insurance (under 65), creating downlines to vertically integrate our marketing proficiency at scale with originating policies

Global Expansion

- Execute on recently completed global ad network and home services marketplace acquisition; follow through on integration plan and drive accelerated growth within the DMS ecosystem
- Capture globally expanding iGaming digital advertising spend

19

U.S. P&C Insurance Digital Ad Spend

U.S. digital ad spend growth decelerated in the financial services industry in recent years. However, according to eMarketer, insurance is projected to remain the largest ad spender, comprising 45% of total financial services spending in 2023.

Accelerated Agent Growth

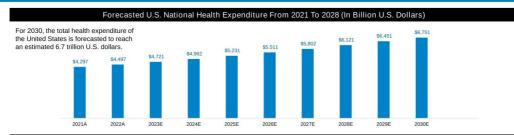

*Agent growth stalled in Q1 due to subsidy changes and market volatility, expect agency growth to return and anticipate being able to achieve 10,000 agents by FY2025.

Growth In Vertical Opportunities

- Due to the pandemic, 73% of US consumers shifted to digital banking and digital payments
 - Due to the change in consumer behavior, banks and other financial services providers are focusing on improving the customer experience of their digital properties
 - Financial services businesses will continue to use digital advertising to gain customers and boost brand reputation

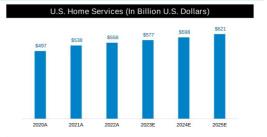

first year enrollment increase across all sectors from fall 2021 4.3%

enrollment increase in private for-profit four-year institutions from fall 2021 2.6%

~16 million students are enrolled in degree-granting universities and colleges in the United States

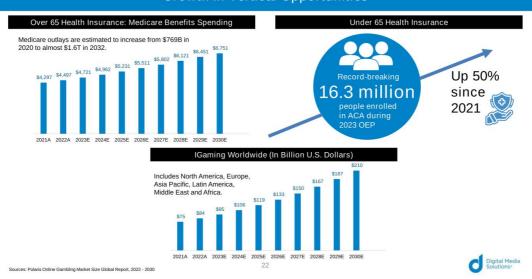

~2.8 million students are enrolled in graduate programs such as doctoral degrees, master's degrees, professional degrees, and graduate-level certification programs

Growth In Vertical Opportunities

Non-GAAP Financial Measures

Variable Marketing Margin

Variable Marketing Margin is a measure of the efficiency of the Company's revenue generation efforts, measuring revenue after subtracting the variable marketing and direct media costs that are directly associated with revenue generation. Variable Marketing Margin and Variable Marketing Margin % of revenue are key reporting metrics by which the Company measures the efficacy of its marketing and media acquisition efforts.

Variable Marketing Margin is defined as revenue less variable marketing expense. Variable marketing expense is defined as the expense attributable to variable costs paid for direct marketing and media acquisition costs, and includes only the portion of cost of revenue attributable to costs paid for this direct marketing activity and advertising acquired for resale to the Company's customers, and excludes overhead, fixed costs and personnel-related expenses. The majority of these variable advertising costs are expressly intended to drive traffic to our websites and to our customers' websites, and these variable advertising costs are included in cost of revenue on the company's consolidated statements of operations.

Adjusted EBITDA, Adjusted EBITDA Margin, Unlevered Free Cash Flow and Unlevered Free Cash Flow Conversion

We use the non-GAAP measures of adjusted EBITDA and unlevered free cash flow to assess operating performance. Management believes that these measures provide useful information to investors regarding DMS operating performance and its capacity to incur and service debt and fund capital expenditures. DMS believes that these measures are used by many investors, analysts and rating agencies as a measure of performance. By reporting these measures, DMS provides a basis for comparison of or ob rusiness operations between current, past and future periods by excluding items that DMS does not believe are indicative of our core operating performance. Financial measures that are non-GAAP should not be considered as alternatives to operating income, cash flows from operating activities or any other performance measures derived in accordance with GAAP as measures of operating performance, or cash flows as measures of liquidity. These measures have limitations as analytical tools, and you should not consider frem in isolation or as a substitute for analysis of our results as reported under GAAP. Because of these limitations, DMS relies primarily on its GAAP results and uses adjusted EBITDA and unlevered free cash flow only as a supplement.

Adjusted EBITDA is defined as net (loss) income, excluding (a) interest expense, (b) income tax (benefit) expense, (c) depreciation and amortization, (d) impairment of intangible assets, (e) change in fair value of warrant liabilities, (f) debt extinguishment, (g) stock-based compensation, (h) change in Tax Receivable Agreement liability, (f) restructuring costs, (f) acquisition costs, and (k) other expense.

In addition, we adjust to take into account estimated cost synergies related to our acquisitions. These adjustments are estimated based on cost-savings that are expected to be realized within our acquisitions over time as these acquisitions are fully integrated into DMS. These cost-savings result from the removal of cost and or service redundancies that already exist within DMS, technology synergies as systems are consolidated and centralized, headcount reductions based on redundancies, right-sized cost structure of media and service costs utilizing the most beneficial contracts within DMS and the acquired companies with external media and service providers. We believe that these non-synergized costs tend to overstate our expenses during the periods in which such synergies are still being realized.

Furthermore, in order to review the performance of the combined business over periods that extend prior to our ownership of the acquired businesses, we include the pre-acquisition performance of the businesses acquired. Management believes that doing so helps to understand the combined operating performance and potential of the business as a whole and makes it easier to compare performance of the combined business over different periods. Unlevered free cash flow is defined as adjusted EBITDA, less capital expenditures, and unlevered free cash flow conversion is defined as unlevered free cash flow divided by adjusted EBITDA.
